Important Information

* Rain water drainage and outlet point varies depending on system projections. Please contact your account manager for an accurate information and details on this matter.

* There is a natural slope for access water to be drained, therefore there will be a level of difference between the front and back height. Please contact your account manager for an accurate information and further detail on this matter.

* In order for the access rain water to be drained correctly from system's rain drainage outlet points and our system requires levelled surface installation. Under that reason the system projection direction must be advised to you by our technical department. To avoid any discrepancy please contact your account manager.
